Grading of Farm Products

Official government grading of Canadian form products has gradually developed, until now practically overy article of produce sold by farmers is marketed inder government grading regulations. Through velopment of a greater confidence buyers in being more certain of the quality of they would receive, government grading has been as important factor in expanding both domestic and expant demand for many agricultural products. Government grading of farm products has also resulted in the producer receiving payment on the basis of quality production. At present these grading regulations are administered by many branches of the government service, and descriptions of the grade standards for different products are published in a wide variety of federal and provincial Acts. While this information is available to the farmer, and free on request, it is necessary for him to secure and study a large mumber of documents to become familiar with the grade standards of the prothere which he has for sale

In this book an attempt has been made to descole the grade standards for pentically every commonly the which farmers of the prairies offer for sale. The member companies of The Noter-New Line Berstann Austecistion believe that the farmer has the right to know, and already and the sale of the sale of the sale of the and madering his own products. It is our hope that this book will make it a gest deal easier for farmers or familiarite themselves with those grade standards. We believe this book dould prove must world and popular

con inioni,

The commercial gender of grain are defined in the Canada Grain Act which is administered by the Board of Grain Com-

WHEAT

- NO. I. MANITOBA HARD. (62 lbs.) variety: Marquis or any variety equal to Marquis. Minimum purcentage by weight of hard vitreous kernsin: 50 per cent. Sound and well matured. Clean. Minimum weight per measured bushel, 62 lbs.
- NO. 1 MANITONA NORTHEBIN (00 line) variety:
 Marquis or any vertice vaguat to Marquis. MusiMarquis or any vertice vaguat to Marquis. MusiBorrads: 60 per cent. Well natured, practiculty
 fore from damaged kernel. Maximum limits of
 foreign material other than wheat pretriative
 muss limits of wheats of other classes or variettes: practically from from Dermin folial
 marquist pretriative manufactures. Maximum marquist prevalety type measured bushol, 61 Rus.
- NO. 1 MANITODA NORTIERM (68 Ina) variety.
 Marquise or any variety squal to idenguis. Million
 mann percentage by weight of hard witcoms kernelit: 60 per cent. Reaccastly well melatred,
 reaccastly free from data carried. Maximum
 pencelicity free from matter other than certain
 gradies; total including cereal grains other than
 melatric total including cereal grains other than
 wheat about 1 per cent. Maximum limite of
 whats of other datases or warteful; Duran about
 Millionium weekfil are incanarile touble. If Hos.

MODIFIEDS (57 No.) variety: and alading Durane: 10 per cent. Wielcom walcht

NITORA NORTHERN (56 the) variety: Spring Wheat, ured. Maximum limits of family, limits of wheate of other of Durwen 4 per cent: total b nimum weight nor merum: 10 per cont. M

Wheat, Rusted or shrunken, but other than wheat; about 214 per cent. Maxi m wheat; 4 per cent, Minim per measured bushed, \$5 lbs.

or Winter Wheat varieties containing from 25 to to per cont, of this, immediate, green, or in any maged berries: shell weigh 62 the to the bushed; shall contain not more than 2 per cost of bariey or rye, and not more than 5 per cent, of Amber or Red Darum

MO. & WHEAT (5) then shall be Bed or White Spring or Winter Wheat varieties, fully developed as far as weight is concerned but concernly demand by front or thinness; shall contain at least th nor cont. of sound wheat, shall woigh not less than \$1 lbs, to the bushel; shall contain not more than * per cont, of barley or rys, and not more than 6 year next of Amber or Red Durum

FEED WHEAT is wheat containing too many frosted or unround herries, or light in weight to grade higher. May be composed of Wheat of any variety or varieties. Maximum Emits of foreign material other than dochage; about 2 per cent. large Seeds (See Note), or Mixed Feed Outs, or in combination; total including cereal grain; bout 25 per cont. All Food Wheat will be made C.C. for Mired Food Onto when containing Its per cent, or more over the grade allowance.

NOTE-Feed Wheat shall be practically free of small Seeds, (for example pigweed, lamb's quarters, etc.) and other moterial removable through a sieve with 4%/64" round perforations. Seeds allowed refer to large Sector such as Wild Buck. wheat

SPECIAL COMMERCIAL GRADES

The following Commercial Brades for SPECIAL WHEAT are only used when standard samples are established for such grades by the Western Committee on Grain Standards, as escasion arises on account of a considerable quantity of RUSTED WHEAT.

NO. 5 SPECIAL shall consist of Red Spring Wheat weighing \$1 the nor bushel. Rueled or Shrusher. reasonably sound and reasonably well matured. grains; 5 per cent. Durum; total wheats of other chastes 10 per cent. Reasonably clear. 870. 6 SPECIAL shall consist of Rod Hering When weighing 48 lbs, per husbal. Rusted or Birminion yeakonably misted and reasteably well innested May contain about 2 per cent, of other energy grains; 5 per cent, Durwe; total whents of office classes 30 per cent, Reasconably clean.

NOTE.—All Rusted or Shrunken Wheat that sontains green or frosted karnels will be graded into the regular grades, and NOT into the Special Grades. Wheat weighing less than 49 pounds per bushel will be graded as Fased Wheat.

GARNET WHEAT

variety: Garact. Midianum percentages by weight of heard vitrewas Sericals: 75 per cent. Weight motured, practically free from damaged kernels. Stanzimum Institut of foreign material other base teld including ocreal grains other than wheat teld including ocreal grains other than wheat practically free. Maximum limits of wheats of other classes or varieties: practically free from sums weight per missagered paule, 49 he.

NO. 2 CANADA WESTERIN GARNET (48 Bea)
variety Garts Minimum percentage by weight
of hard vitreous kernels; 69 per ears. Reasonably
keemels. Maximum limits of foreign materials
ether than whosts practically free from nather
ether whosts practically free from nather
grains other than whosts about 1 per count. Maximum limits of whosts of other eleases or varieties.
Desrens about 1 per cent; their limits by Desrens.

mum limits of wheats of other cleases or varietien: Darum about 1 per east; total indrinking Darum 16 per cest. Minimum weight per measured bushol, 58 hs. NO. 8 CANADA WESTERN GARNET (ET list, variety; Garnet, Minimum sercontage by weigh

variety: Garnet. Minimum percontage by we of hard vitroous hernele: 16 per cent. Such from higher grades on account of lightly frommature or other light damages, reaconably matured. Maximum Hostin of foreign mat

other than wheat: practically free from matter other than cereal grains; total including oreal grains other than wheat about 2 per cent. Naximum limits of wheats of other classes or varieties; Dorum 8 per cent; total including Durum; 18 per cent, Minimum weight per measured bushel, by the

Ournet wheat not slightly for one of the above three grades will be randed into No. 4. Special or the commorcial grades of Red Spring White No. 5. No. 5. Special or the commorcial grades of Red Spring White No. 6. No. 5. Special or 1sto commercial grades of Garrett Wheat which may be named and defined by the Western Committee on Grain Standard.

Garnet Wheat otherwise eligible for the grades of No. 1 C.W., No. 2 C.W. or No. 3 C.W. Garnet but containing over fitness per cell, of Wheats of other classes or varieties of Red Spring Wheat will be graded as No. 1 Mixed Wheat.

Stream Willehres—55 to 16 %—are definitely preferred in the export market, and those weights can be cut only from carcasess weighing 141 to 145 %. While Willahless of other weights are exported, they are much least definible and ore subject to discounts.

A reasonably safe weight range for live hoge of average yield in 195 to 215 lb.

Core attention to the weight of his market bogs will yield the producer many extra dollars in immediate returns and also contribute to the improve-

ment of the position of Canadian bacon on the British market.

BEEF GRADES

The Beef grading regulations are administred by the Lirectock and Lirectock Products Directors, Marketing Service, Georges Department of Agriculture.

CHOICE BEEF (field Bessels). A choice look concess should alway except that in the case of a normal in the field still chairs, allowing one, by a mode in the field still chair, allowings one, by a mode in the field still chair, allowings one, by a mode in the field still chair allowing one, and the field still chair and the chair and the referred field throughout. Resemb., once and of the stoud be very well field, and beauty finded. The neck should be when the field of field should be short and well field d'finale should be short and well find d'finale should be short and the find d'finale should be short an

The flosh should be firm, velvely fine grained and of an attractive light or cherry red colour Marbling should siways be present in the letts and tibs.

The satisfages on the chine and breast bounds hould be party white, but may be signed, where the satisfact of the satisfact o

a yellowish tungs. This fat should, as a rule, be smooth, but may be slightly ways. Waslingse in interior covering should debar a careaus from this grade.

GOOD REEF-(Blue Brand) Good beef carchants abseld have good conformation, finish and quality flowards lains and rits should be reasonably rest. Chocks and plates about it is moderately thate. The nack should be reasonably short and thick.

The flash should be reasonably short and thick.

softness is permissible. The colour may range from a .ent cherry red to a slightly dester no but should not be exceeding dark. The "eye" of the rib and loin should be above the average in thickness. Some marbling should be present in the chicker outs.

The fact covering about system will over the section's surfaces but may be nonement language in the section are surfaces and surface section are surfaces and solution and shanks. The hips and shanks points may be slightly visible. The fact covering should be reached by firm, amonth and white may be somewhat sort or have a slightly yellowish times.

The kidney, crotch, cod or adder, and other interior fate should be moderate in quantity but may be somewhat want. The interior walls of the fore quarters should be at least narrising

WOOL GRADING REGULATIONS FOR WESTERN FLEECE

The wood grading repristions are advantaged by the Livestack and Livensch Products Division, Marketing Service, Decription Department of Agriculture.

RANGE CLIPS—Fleece won produced under range conditions and predominantly Fine or M Blood Blaple (56's, 69's and up) dividied into two classes

Cheice-Flences bright in colour, good condition, light shrinking, uniform and comparatively free from earthy matter.

Average—Florous that are loss uniform, more storm washed, heavier to abricable, not as bright and ontaining were carrier matter than Choice Stroces.

Grades for Choice and Average Range. Fine staple (64/78's), Fine Clothing '5 Blood Staple (66/64's) '5 Blood Clothing, '5the Blood

Staple (45/56 s) % the Blood Clothing; % Blood Staple (35/54 s) Low % Staple (45'42), and Course (45/42).

DOMESTIC CLIPS—Flence wool produced under farm conditions and predominantly % the and % Blood Staple (45ks to 56%) dwifed into there make

observa.— Bright-Choice, fight shrinking florous, very good color, an form quality and comparatively

free of earth and chaff
Sem Bright-Good, well grown wools, com-

in appearance and slightly heatler than Bright

Dark Sam. Brotht-An average wee: Sem-Bright to Dark to appearance and carrying more organ our vegetal, unatter han the letter type Sure Dright wee.

Grades for Sright, Sensi-Bright, and Dark.— Fine Staple Fine Clothing & Bood Staple, & Blood Clothing & the Blood Staple (Butk 80's) & the Bood Clothing & Blood Staple (Butk 80's)

REJECTS OR DEFECTIVE WOOLS—Wool of slowi ar quality to the regular grades but with a "infect" impairing the value for manufacturing purposes.

Grades-Fone Groy and Black Mediam and Carang Gorgi and Black Fine Chaffy and Bry (Laght), Pine Chaffy and Berry (Heavy). Mediam Craffy and Barry (Light). Mediam Chaffy and Berry (Kasvy). MISCELLANEOUS GRADES - Karakulo Black Scotch Black Pace, Mohair Washed Wool-White Clear Stained or Gray Scody and Tuga.

GRADES OF MIDES

The following electifications for the parchasing of hides

CATTLE HIDES

1. Packer Hides — Art those purchased from

(u) No. 1 Shall be free from cuts, or other had damage, shall contain no wire or horn scratches, have no warrs, and he of good pattern.

(b) No. 2 May contain deep mores or cuts, may have some damage to the grain through wire or horn paractics, and he signify off nattern.

scratches, and be sightly off pattern.

(c) BitANDS: No. 1 and No. 2 grades as described above shall apply in this class but the bides are

shove shall apply to this class but the hides are from branded animals.

(d) KOSHERSI are those from animals killed by a Rabb. These bides are discounted & cost a

points on account of the method of suffing the threat crosswise, which partially destroys the pattern (e) GRUBHY HIDES-Are those which have been

badly damaged with warble files.
Packer hides are selected according to the follow-lag weights:

Heavy-68 ba and up. Medium 42 to 68 bs. Light -23 to 42 bs. Kipskins-15 to 52 bs. Callains-15 bs. Sown

 Country Hides—Are these purchased from country betchers and farmers. They are bought on a flat basis for No. 1 and No. 2 grades.

No. 2 Country Hodes are discounted 50% because of Lenuy poorly salted, badly dragged, balcelipped, containing bad cuts, bad warble damage, or poorly relitance. Country hides are not selected for weights, except for hipskids which weigh from 15 to 23 fbs., calf whise 15 lbs and under, and hides weighing over 80 ibs. which are discounted.

MORECHIDES are divided into two general

1. Foxfarm Teke-off

hadly off nattern

Each class contains three grades NO I must be of smod pattern contain full brade

and shanks contain he cult, and he free from damage to grain through deagging MO 2 may be off pattern but must contain not more

than 5 cuts and be free from damage to grain.

NO. 5 may be halvellpped, contain damage to grain through draugtar have more than 5 cuts and be

THE GRADING OF SILVER FOX PELTS.

The new jon groung regulations are estimated by the Linesteel, and Linesteel, Product Devices, Marketing Service, Dominion Department of Agriculture.
This following shall be the prescribed colour

The following shall be the prescribed colour Shanes of standard silver and white marked silver fox points.—

"DARK" means less than 40 per cent of the area of the back of the pelt is covered with siver guard hairs,

"HALF SILVER" means 40 per cent to 50 per cent of the area of the back of the pelt is covered with silves court hales

stives guard hairs.
"THREE QUARTER SILVER" means over 60 per cent to 30 per cent of the area of the back of

the pait is covered with after guard balts "BILVERIT" means over \$0 per cent to \$0 per cent

of the 4rms of the back of the pell is covered with allver guard bairs,
"WHILL BILVER" means over \$6 per best of the arms

of the hack of the park is covered with allver general halps. The following shall be the prescribed grades for standard silver fox (including Alaskan) and white marked silver fox pelts CANADA SPECYAL Born men pelts extraly furred

CANAIA SPECIAL—Spec men petu aventy tured throughout clear denrely silvered (having regard to colour phase) with underfur and guard hair binding in colour primentes o'Asarcter fainty, volume and after bar should be given proper consideration.

CANADA SELECT—Poits of extra good quality evenly fired disarty salvered (having regard to colour phase) of reasonably clear colour primenras and reasonary and with only salver weak-nasses permitted.

CANADA GRADE "A"—Poits of good quality, that

acter and colour, with guard hair and underfur blending. CANADA ORADE "R" Poles of average quality and

CANADA GRADE "B" Pelts of average quality and character. They may be slightly off colour. CANADA GRADE "C"—Profe of fair quality they

may be open, weak furred, somewhat off colour and seking in character

INFESIOR Pale of poor quality throughout and definite achieve in character

RESECT Pelts of extremely low quality throughout, including culls and sameopa.

The following shall be the prescribed description and colour phases of platinum, platinum sliver, and pearl peatinum fox pelts.

Description

PLATINUM: Are of a whiteigh steel grey occour with
a same intermination of dark bairs, the underfor

having a light blush grey shade blending with the guard hars, giving a rich jualinum effect PLATINUM SILVER—Are of a whiteish steel gray colour with underfur a boutsh shade and with
